KATTEN MUCHIN ROSENMAN LLP 575 MADISON AVENUE NEW YORK, NY 10022-2585			ART UNIT 2891	

DATE MAILED: 09/28/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/808,193

Applicant(s)

KOYANAGI ET AL.

Examiner

Caridad M. Everhart

Art Unit

2891

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-18 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-18 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. ____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Applicant's arguments filed 7-11-2005 have been fully considered but they are not persuasive. Applicant has argued

That Haukka does not teach CVD of oxide of the same metal

That Haukka does not teach heated water.

The first argument is respectfully found not persuasive because the claim recites "including oxide of said metal". Haukka discloses in paragraph 0106 that the layer over the monoatomic film may be a nanolaminate of ZrO and Al₂O₃, which would be an oxide layer that includes oxide of aluminum, which is the monoatomic film. In addition, Haukka teaches in paragraph 0110 that the aluminum oxide may be deposited by CVD. With respect to the second argument, Haukka teaches that water may be one of the feed composition (paragraphs 0054 and 0066, for example). It is clear that because the methods are ALD and CVD that the water would be in vapor form, and therefore would be heated.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

Claims 1-4, 6, 7, 11-14, 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Haukka, et al. (US 2002/0115252A1).

Haukka, et al disclose depositing a monoatomic film including a metal on a base by using a source gas and no oxygen (paragraph 0061 and 0069). Thereafter, a metal oxide film is deposited by CVD (paragraph 0097), as Haukka, et al teach that a CVD technique such as MOCVD can be used in the cited paragraph. Oxidizing gas may be

Art Unit: 2891

supplied before the step of providing the monoatomic film, as Haukka, et al teach that the silicon substrate surface may be treated with water(paragraph 0045). The oxidizing gas may be oxygen or ozone(paragraph 0039). Oxidizing gas is provided to the surface of the monoatomic film(paragraph 0071). The step of forming a conductive film on the metal oxide film is also taught (paragraph 0008). The metal oxide film includes a layer of the aluminum oxide, which can be deposited by CVD(paragraph 0110). The CVD film can be tantalum oxide(paragraph 0056 and claim 20). The metal source includes the compound recited in claim 7(paragraph 0066). Hafnium and titanium compounds can be included (paragraph 0056). Niobium compounds can also be included (claim 20).

Claim Rejections - 35 USC § 103

Claims 5, 15, 16, 18 rejected under 35 U.S.C. 103(a) as being unpatentable over Haukka, et al as applied to claim 1 above, and further in view of Dean, et al(US 2005/0009335A1).

Haukka, et al teaches that the layers have use in capacitor structures(paragraph 0015).

Haukka, et al is silent with respect to treatment of the substrate with HF, although Haukka, et al does disclose an H-terminated silicon substrate(paragraph 0046).

Dean et al discloses the HF treatment of a silicon substrate prior to ALD (paragraph 0065).

Art Unit: 2891

It would have been obvious to one of ordinary skill in the art to have used HF as taught by Dean et al in the process taught by Haukka, et al because Haukka, et al teach an H-terminated silicon substrate, and the use of HF as taught by Dean et al would result in an H-terminated silicon substrate.

Claims 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haukka, et al as applied to claim 1 above, and further in view of Derderian, et al (US 2003/0207593A1).

Haukka, et al is silent with respect to the recited compounds.

Derderian, et al teach that the precursor for titanium deposition can be $TiCl_4$ (paragraph 0030, toward the middle of the first column of page 3). Derderian et al also includes niobium (paragraph 0041) in the embodiments, so that it is implied that a chloride of niobium could be used.

It would have been obvious to one of ordinary skill in the art at the time of the invention to have used the compounds taught by Derderian et al in the process taught by Haukka, et al because both references teach ALD of oxides, and because metal chloride compounds are well known in the art to deposit metals.

With respect to the recited alkyl of Hf, this would have been within the ordinary skill in the art to have chosen, because Haukka, et al disclose that metal alkyls of aluminum may be used (paragraph 0064), so that one of ordinary skill in the art would have inferred that metal alkyls of the other metals can also be used.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2891

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Caridad M. Everhart whose telephone number is 571-272-1892. The examiner can normally be reached on Monday through Fridays 7:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, B. Baumeister can be reached on 571-272-1722. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
